Examination and Quality Control Section

Examination Control

Overall Assessment (Scale 100 points)

1. Class attendance = 10%
2. Assignments = 20%
3. Midterm Exam = 20%
4. Final Exam = 50%

Passing Requirement: Minimum score of 50% on both the overall assessment and final exam in order to pass a subject.

Examination Control

Scenario 1 (Fail Final Exam): Even if a student performs well during the semester, they will fail if they do not pass the final exam.

- Attendance: 10%
- Assignment: 15%
- Midterm: 15%
- Final Exam: 20% (Calculated from a raw score of 40/100 on the final exam)
- Total Score: 60%

Result: FAIL. Although the total score is 60%, the student failed to meet the requirement of scoring at least 50% on the final exam.

Examination Control

Scenario 2 (Low Total Score): A student will fail if their overall assessment is below 50%, even if they pass the final exam.

- Attendance: 5%
- Assignment: 5%
- Midterm: 5%
- Final Exam: 30% (Calculated from a raw score of 60/100 on the final exam)
- Total Score: 45%

Result: FAIL. Although the student passed the final exam, they failed the course because their total score (45%) did not meet the minimum 50% requirement.

Examination Control

Scenario 3 (Pass): A student will pass if their overall assessment and final exam are above 50%.

- Attendance: 10%
- Assignment: 10%
- Midterm: 10%
- Final Exam: 25% (Calculated from a raw score of 50/100 on the final exam)
- Total Score: 55%

Result: PASS.

Examination Control

Retake Exam

Students who do not meet the passing requirements are granted one opportunity to sit for a retake exam. Please note that the final score for a retake exam is capped at 60/100.

- *Scenario 1 (Score > 60):* If a student scores higher than 60 (e.g., 65 or 70), their recorded score will be adjusted down to the maximum cap of 60.
- Scenario 2 (Score 50–59): If a student scores between 50 and 59, their score remains unchanged and is recorded as is.
- *Scenario 3 (Score < 50):* If a student scores lower than 50, they must repeat the failing subjects with subsequent promotions.

Examination Control

Course Repition

Case #1: Students who fail the retake exam must repeat the failing subjects with subsequent promotion.

Case #2: Students who *fail more than three subjects* in the retake exam must *repeat all subjects* with subsequent promotion on the following year.

Quality Control

Quality Control

During the semester, students have the opportunity to complete the survey twice, at mid-semester and the end of the semester, to help identify improvement areas for teaching performance. The LMD team will facilitate these surveys.

Examination Control Section

Exam Process

1. Preparing final exam announcement and final exam schedule
2. Preparing invigilators and final exam student list – identifying students who fail attendance
3. Preparing overall class assessment folder requesting lecturer submission
4. Preparing excel spreadsheet for overall score input
5. Collecting the score of final exam and releasing the result
6. Preparing re-exam announcement
7. Collecting the score of re-exam and releasing the re-exam result
8. Preparing course repetition for students who failed after re-exam and pass this information to Student Affair Division to proceed.

Internal Quality Control Section

Internal Quality Process

1. Conducting student survey for each class physically or virtually in case current workload
2. Collecting and transforming data into Excel CSV file
3. Preparing an Excel CSV file per lecturer
4. Zipping the file consisting of all lecturers' Excel CSV file and passing to Digital Team for analyzing the data
5. Retrieving the result from Digital Team and preparing the report for the management.
6. Coordinating with Pedagogical Section to proceed class observation

Former UK Prime Minister, Winston Churchill once said,

"Those who never change their mind never change anything"

Student → Étudiant → Scholar
